SUMMARY

Senior Analytics and BI Developer with 10+ years of experience at leading financial services firms, combining deep finance domain knowledge with hands-on expertise in SQL, Python, Tableau, and cloud technologies. Experienced in building executive dashboards, KPI frameworks, and scalable data solutions that automate processes and enable self-service analytics. Strong focus on leveraging AI and LLMs to accelerate development, improve efficiency, and solve complex business challenges.

PROFESSIONAL EXPERIENCE

Millennium Management

Miami, FL

Reporting Lead, Finance and Business Development Analytics

Jun 2023 – Jul 2026

- Designed and productionized end-to-end cloud-native analytics pipelines, integrating data from multiple sources using SQL, Python, and Airflow to automate workflows, improve data reliability, and enable self-service analytics for 30+ business users
- Created dimensional models, reusable semantic layers, and curated data marts for Finance and Business Development reporting, improving query performance by 4–6× and reducing delivery of new metrics from 1 week to 2 hours
- Owned the portfolio manager acquisition cost KPI framework, translating complex financial and contractual terms into standardized metrics, supporting the CIO Office in deal negotiations and planning across a \$100M+ annual budget
- Developed near-real-time portfolio manager pipeline reporting, providing leadership visibility into pipeline stages, hiring trends, and onboarding timelines to support workforce planning across 300+ trading groups
- Leveraged AI-assisted development tools such as Cursor and Claude Code to accelerate code generation, testing, debugging, and documentation, improving productivity and development speed

Goldman Sachs

New York, NY

VP, Business Intelligence Developer

Jun 2018 - Jun 2023

- Led development of 15+ analytical dashboards and reporting solutions across the trade lifecycle within the Equities business, providing senior leadership with greater visibility into business performance and client experience
- Transformed the firm's sales commission allocation platform by replacing legacy custom code with an automated Alteryx and Tableau solution, reducing annual operating costs by approximately \$1M while improving allocation transparency and controls
- Acted as strategic analytics partner to senior leadership, translating ambiguous business requirements into actionable insights through ad-hoc analysis, scenario modeling, and executive-level reporting to support data-driven decision-making
- Collaborated across Finance, Operations, and Engineering to validate assumptions, resolve data and reporting discrepancies, and improve the accuracy and consistency of management reporting

Bank of America Merrill Lynch

New York, NY

AVP, Change Management Program Lead

May 2016 - Jun 2018

- Oversaw a \$50M+ portfolio of strategic Technology and Operations investments, providing senior leadership with analysis of program performance, resource requirements, risks, and key business priorities
- Developed strategic roadmaps, KPI frameworks, and management reporting used to evaluate performance and support prioritization across concurrent initiatives
- Engaged across Finance, Operations, Technology, and HR to analyze business requirements, identify execution risks, and provide leadership with data-driven insights to support decision-making

Finance Management Associate Analyst (leadership development rotational program)

Jul 2015 - Apr 2016

- *1st Rotation: FP&A* – Supported budget planning and financial advisor performance strategy by forecasting compensation related expenses and maintaining robust financial models. Produced monthly management reports with insights into revenue and cost drivers, directly informing the firm's strategic budgeting and resource allocation decisions
- *2nd Rotation: Controllers* – Conducted in-depth analysis of balance sheets and income statements to identify key performance drivers and variance trends. Investigated material variances to improve reporting accuracy and provide actionable insights to senior leadership

EDUCATION

Georgia Institute of Technology | OMS in Data Analytics | 18 graduate credits completed
Baruch College, CUNY | BBA in Accounting | May 2014

SELECTED PROJECTS

Trader Entity Resolution Workflow | Designed a graph-based AI entity resolution platform leveraging similarity matching, graph analytics, and LLM-assisted classification to identify duplicate trader records across Salesforce, Appian, and Workday, reducing manual reconciliation efforts by ~50%

Trader Payout Alerts | Led development of a P&L analytics workflow that detects anomalies and sends alerts to the compensation accounting team for proactive review and identification of operational errors, enhancing accuracy and risk management

Equities Client Experience Dashboard | Designed and built an interactive dashboard mapping institutional client onboarding and trade lifecycle workflows within the Equities business, uncovering key pain points that helped executives streamline processes and cut onboarding time by 25%

TECHNICAL SKILLS

Programming: SQL, Python • **Business Intelligence:** Tableau, Power BI, Executive Dashboards, KPI Frameworks • **Data Engineering & Modeling:** ETL/ELT, Airflow, NiFi, APIs, Dimensional Modeling, Semantic Models • **Cloud & Databases:** AWS (Redshift, RDS, S3), PostgreSQL • **AI & Automation:** RAG, Prompt Engineering, Vector Embeddings, Similarity Search, AI Evaluation, Cursor, Claude Code • **DevOps:** GitHub, GitHub Actions
