SUMMARY

Analytics and Business Intelligence Developer with 10+ years of experience at leading financial services firms, combining deep financial operations knowledge with hands-on expertise in SQL, Python, data visualization, and financial modeling. Experienced in building executive dashboards, KPI frameworks, and scalable data solutions that automate processes and enable self-service analytics. Strong focus on leveraging AI and LLMs to accelerate development, improve efficiency, and solve complex business challenges.

PROFESSIONAL EXPERIENCE

Millennium Management

Miami, FL

Software Developer, Finance and Business Development Analytics

Jun 2023 – Jul 2026

- Designed and productionized end-to-end AWS cloud-native analytics pipelines, integrating data from multiple sources using SQL, Python, and Airflow to automate workflows, improve data reliability, and enable self-service analytics for 30+ business users
- Created dimensional models, reusable semantic layers, and curated data marts for Finance and Business Development reporting, improving query performance by 4–6× and reducing delivery of new metrics from 1 week to 2 hours
- Built the portfolio manager acquisition cost KPI framework, translating complex financial and contractual terms into standardized metrics, supporting the CIO Office in deal negotiations and planning across a \$100M+ annual budget
- Developed near-real-time portfolio manager pipeline reporting, providing leadership visibility into pipeline stages, hiring trends, and onboarding timelines, enabling workforce planning across 300+ trading groups
- Leveraged AI-assisted development tools such as Cursor and Claude Code to accelerate code generation, testing, debugging, and documentation, increasing productivity and development speed

Goldman Sachs

New York, NY

VP, Business Intelligence Developer

Jun 2018 - Jun 2023

- Led development of business intelligence, reporting, and automated workflow solutions using Alteryx, SQL, and Tableau, transforming complex financial and operational data into a single source of truth for Finance and Operations teams
- Acted as a strategic analytics partner to senior leadership, translating ambiguous business questions into well-defined metrics through ad-hoc analysis, scenario modeling, and executive-level reporting to support data-driven decision-making
- Modernized the firm's sales commission allocation platform by replacing legacy custom code with an automated solution, reducing annual operating costs by \$1M+ while improving transparency and controls
- Designed and built a suite of interactive Tableau dashboards analyzing client onboarding timelines and costs, uncovering root causes of delays and enabling leadership to address process bottlenecks and reduce onboarding expenses by 25%

Bank of America Merrill Lynch

New York, NY

AVP, Change Management Program Lead

May 2016 - Jun 2018

- Oversaw a \$50M+ portfolio of strategic Technology and Operations investments, providing senior leadership with analysis of program performance, resource requirements, risks, and key business priorities
- Developed strategic roadmaps, KPI frameworks, and management reporting used to evaluate performance and support prioritization across concurrent initiatives
- Ran weekly program reviews with 20+ stakeholders across Finance, Operations, and Technology to collect status updates, surface bottlenecks and delays, and track cost-saving metrics, ensuring alignment on key deliverables

Finance Management Associate Analyst (leadership development rotational program)

Jul 2015 - Apr 2016

- Selected for the full-time Finance Management Program following a successful summer internship. Completed 2 rotations across FP&A and financial controls, gaining experience in budgeting and forecasting, financial modeling, management reporting, variance analysis, and strategic decision support

EDUCATION

- Georgia Institute of Technology | OMS in Data Analytics | 18 graduate credits completed
- Baruch College, CUNY | BBA in Accounting | May 2014

ADDITIONAL PROJECTS

Trader Entity Resolution Workflow - Millennium Management | Designed a graph-based AI entity resolution platform leveraging similarity matching, graph analytics, and LLM-assisted classification to identify duplicate trader records across Salesforce, Appian, and Workday, reducing manual reconciliation efforts by ~50%

Trader Payout Alerts - Millennium Management | Led development of a P&L analytics workflow that detects anomalies and sends alerts to the compensation accounting team for proactive review and identification of operational errors, enhancing accuracy and risk management

Equities Client Experience Dashboard – Goldman Sachs | Designed and built an interactive dashboard mapping institutional client onboarding and trade lifecycle workflows, uncovering key pain points that helped executives streamline processes and cut onboarding time by 25%

TECHNICAL SKILLS

Programming: SQL, Python • **Business Intelligence:** Tableau, Power BI, Executive Dashboards, KPI Frameworks • **Data Engineering & Modeling:** ETL/ELT, Airflow, NiFi, APIs, Dimensional Modeling, Semantic Models • **Cloud & Databases:** AWS (Redshift, RDS, S3), PostgreSQL • **AI & Automation:** RAG, Prompt Engineering, Vector Embeddings, Similarity Search, AI Evaluation, Cursor, Claude Code • **DevOps:** GitHub, GitHub Actions
